

Connecting MOST, ACP and Goals of Care

Conversations about:

- Written expression of wishes
- Advance Directives
- Representation Agreements

The health care provider should encourage the adult to engage in ACP conversations with loved ones and health care providers.

Conversations about:

- Clarification or review of ACP
- Diagnosis, prognosis, risks, and benefits of treatment
- Medically appropriate options for health care that aligns with the adult's goals of care

The health care provider should encourage the adult to engage in Goals of Care conversations with loved ones and health care providers.

Conversations:

- Between the adult, Most Responsible Practitioner and other health care providers about the kinds of health care to provide in certain circumstances

The Most Responsible Practitioner completes a **MOST**.

Care will be consistent with the adult's values, goals and health
